NOTE: THIS PACK contains the latest MR Dutch East Indies scenery

NOTE: WRT PACTEX & STOCK TEXTURES: These add-on airfields look best when used with PacTex ground textures- with the exception that the two stock files, *vriversu.bmp* and *vroadssu.bmp*, are retained.

NOTE: DUMP ALL EXISTING MR DUTCH EAST INDIES (DEI) FILES (THEY WILL CAUSE CONFLICT).

IF YOU HAVE THEM ALL IN THE SAME FOLDER THIS WILL BE EASY.

NOTE: There is some LWM type scenery in this pack so it is imperative that you *copy* all of the files in your scenedb/world/texture folder into your main CFS2 texture folder. Its a one time deal- it won't hurt a thing.

NOTE: REQUIRED SCENERY OBJECT LIBRARIES:

Cfs2_Liberty_Ship.zip
AF_AA_Pak2.zip
af_cstdef2.zip
AF_BnkrPak.zip
CFS2_Library_Objects_part_1.zip
CFS2_Library_Objects_part_1_Fix.zip
mr_af_nielson_objects_pack.zip
lw_library_objects.zip
lwd_tree_library.zip
ldw_trees.zip

Thats all I can think of- but they should cover it. ;)

INSTALLATION:

When unzipped the following 4 folders and files will appear:

MR Dutch East Indies (folder)

Place CONTENTS in Main CFS2 SCENERY Folder (folder)

MR Dutch East Indies GSLs (folder)

mr_dutch_east_indies_080512_README.pdf (this file)

1. Drop the *entire* **MR Dutch East Indies** folder into your main CFS2 folder- **if asked to over-write, say yes.**- and then activate it. If you have an existing MR Solomons folder, delete it or deactivate it.
2. **THEN MOVE IT TO OR NEAR THE TOP OF YOUR SCENERY LIBRARY LIST!**
3. Next, do what the name of the "**Place CONTENTS in Main CFS2 SCENERY Folder**" folder says to do- **if asked to over-write, say yes.**
4. Go to your CFS2/GSL folder.
5. Make a back-up copy of your current **cfs2.gsl** file. Its OK to leave it in the GSL folder- but be sure to RENAME IT
6. Inside the " MR Dutch East Indies GSLs " folder you will find 2 files. Place them both in your CFS2/GSL folder- **if asked to over-write, say yes.**
7. Open **GSLMan.exe** from inside your CFS2/GSL folder.
8. From the "Available Custom Gobs" list hi-lite **mr_dei.gsl**
9. Click the "ADD" button.
10. Wait until GSLMan.exe says it's thru then...
11. Close GSLMan.
12. Thats it. The scenery is installed.
